

DeiC Conference 2025

Digital Sovereignty in the digital research
infrastructure

Sponsorship brochure

Become a sponsor

Welcome to the DeIC Conference – the event of the year in Security, Network and Services, Data Management, HPC and Quantum. The conference is the meeting place for everyone working in the field of e-infrastructure, especially for research and education.

Present your technical solutions to the technical experts who have close contact with users and meet their everyday needs. The atmosphere at the conference is informal. Participants place great importance on professional and social networking opportunities. This provides a good foundation for initiating contact afterward for more business-oriented meetings. We expect around 250 participants at the conference this year.

What we offer sponsors

Sponsors will have a booth in the exhibition area, located close to the four conference rooms. In the exhibition area, participants will also have the opportunity to enjoy breaks and coffee.

A booth measures 3x2m. A more detailed overview of the exhibition area with possible placements and booth sizes will be provided later.

In the largest sponsor package, we offer a 25-minute presentation or workshop in one of the conference's 4 tracks.

If you wish to have a presentation in this year's program, we need to know at the very latest by Monday, May 19th . Please provide information about the track, topic, and possibly the speaker's name. Feel free to ask us about the topic and content. Based on previous years' experiences and feedback from participants, we suggest that you:

- Emphasize the technical aspects rather than the sales pitch in your presentations.
- Make the presentation interactive, for example, by organizing a workshop or other engaging activities.
- Provide the title and description of the presentation as soon as possible so that participants can familiarize themselves with your part of the program when planning their visit.

Participants are professionals in their field, so we recommend that, in addition to your booth, you also mingle with participants, both at the official networking events and in the discussions that arise in various sessions. This can help you establish valuable, strong, and long-term connections.

Marketing

You have the opportunity to create general marketing materials related to the conference – with reference to the conference. For GDPR reasons, DeiC does not provide participant email addresses.

About DeIC

The Danish e-Infrastructure Consortium (DeiC) is a collaboration with and among Danish universities focusing on the national digital research infrastructure. Its goal is to ensure efficient and secure computing, storage, quantum resources, and network infrastructure for Danish research and education. DeiC coordinates Denmark's participation in Nordic and European e-Infrastructure collaborations and projects.

DeiC is a virtual organization, where the board consists of members at the executive level from the eight Danish universities. The day-to-day management is carried out by a CEO appointed by the board. The DeiC organization is a unit under the Ministry of Higher Education and Science, established by document no. 70 on April 19, 2012.
