

Let's talk about FAIR data...

"FAIR data?  
I am a researcher  
- not a data  
manager"

Let's talk about FAIR data...

“FAIR is a concept that supports the principles for good scientific conduct in research: honesty, transparency and accountability”

[www.vidensportal.deic.dk/FAIR](http://www.vidensportal.deic.dk/FAIR)

FAIR data are: **F**indable, **A**ccessible, **I**nteroperable and **R**eusable.

Making your data FAIR means maximizing the project's output, increasing your impact and enhancing your recognition as a researcher.
