DeiC HPC-Forum
Meeting 19.01.2014
Zoom: https://deic.zoom.us/j/2909030409

Invited members and support:
- Members, present: Jens Vinge Nygaard
- Helle Zinner Henriksen
- Antonio Rago
- Himanshu Khandella
- Lars Nondal
- Philippe Bonnet
- Søren Besenbacher
- Sven Karlsson
- Thomas Schrøder
- Members, absent (announced):
- Members, absent (not announced):
- Support: Eske Christiansen, …
- Support: Rune Gamborg Ørum

Minutes by: Rune Gamborg

Item	Issue	Comments	Actions
1	**Information and approval of minutes from last meeting** Approval: A. Minutes from meeting	
	Presentation of the discussion on the calculation of the numbers in the DeiC HPC calls.	Antonio: There is a potential for larger allocations than are currently in the calls, and issues with the consumption numbers as well. Unused resources are not reoffered. There is a mismatch with the reality of how a HPC center and its users operate, and the model is built to under allocate the actual available resources. It is possible that we are dealing with structural under allocation of up to 50% Could HPC forum take part in formulating a new solution to the DeiC board? Philipe: A proposal could be an appendix to the upcoming report Helle: We should aim for better clarity and distribution Himanshu and Sven have expressed interest in joining an effort.
2	**Updates on the survey process**	Roundtable on the status: KU: A shorter form of the survey is being sent to department heads. And we are contacting an umbrella of users. AU: We will circulate the write-up at the management levels

		SDU: The timeline for SDU had a timespan on over a year
		Philipe: We should then make it clear in your recommendations, that there is a need for a continuing survey. And this time we should work with what is possible.
		CBS: We will move ahead with the template from SDU, and invitations for talks with heavy users. We would like focus on more aspects than just hardware.
		DTU: We are working on our version as well
		RUC: We are also trying to reach users that are not HPC users today
		Philipe: We should as HPC forum qualify the numbers that we end up with
3	**Key points about international landscape**	What are the trends? Who are interested in subgroups. PM is in bold: • Cloud Sven, **Philip**, Piotr, Lars • HPC interfacing with Quantum Antonio, Sven, **Eske** • GPU **Antonio**, Sven, Thomas Bligaard • Accelerators / Specialized hardware **Sven**, Philip Eske: Our recommendations should be coordinated with the work from the Q-access Philipe: The goal is to inform what resources DeiC needs and how it should interact with the international landscape. We should provide the board with a view of the relative importance of the different technologies. Eske: The recommendations should also inform the investment strategy including maturity levels. Sven: Can HPC-forum be involved in the ongoing discussion with potential consortia? Philip: This could be a regular point on the agenda. Antonio and Sven could converge on the paragraph concerning the HPC integration with Quantum.
6	**Around the Table** What happens at the universities related to HPC? This is both for research and teaching but also for usage and resource allocation etc.	
6	**AOB.**
